About us

For over 25 years Spielart have been in the forefront of designing, developing and manufacturing adventurous playground equipment. Specializing in recreational play areas for different age groups. With our wealth of experience and unique sense of creativity, we seek to create an ideal space for little adventurers and explorers. Our designs transform the environment into a new experience where suddenly you are a princess, a wizard, a pirate, go on a treasure hunt or conquer a witch's forest. You could maybe even discover characters from your favorite fairy-tales! The imagination knows no limits.

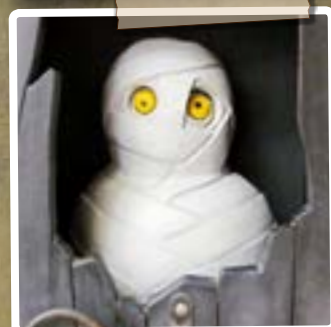

All our play equipment and designs are coordinated together to the desired topic and are added together as components of the story. We want to build worlds of experience that will awaken children's imaginations. With great attention to small details, the joy of discovery remains long after the playground visit.

Children and the clients will find their wishes and ideas inside the realized concept and have the feeling of being an integral part of the project.

Large projects are not the only interest for us at Spielart. From the smallest to the largest area, in the nursery or in the private sector, we custom tailor our designs to the available space, the future uses and find solutions for every available budget.

Our production facility in Mechterstädt, Thüringen

A detailed illustration of a Robinia tree with green leaves and a brown trunk. A woodpecker is perched on a branch, and a squirrel is at the bottom. A green sign is pinned to the tree trunk, and a brown sign is pinned to a cross-section of the tree. The background is a textured, light brown surface.

Robinia

Thanks to its resistance to abiotic and biotic influences, Robinia has a very special position among European woods.

The EN 350-2 standard classifies wood varieties according to their resistance.

Robinia is the only **resistance class 1** wood variety that is cultivated in Europe.

Bark
Sapwood
Heartwood

It means that robinia is ideal for outdoor use and can be used without impregnation or supports.

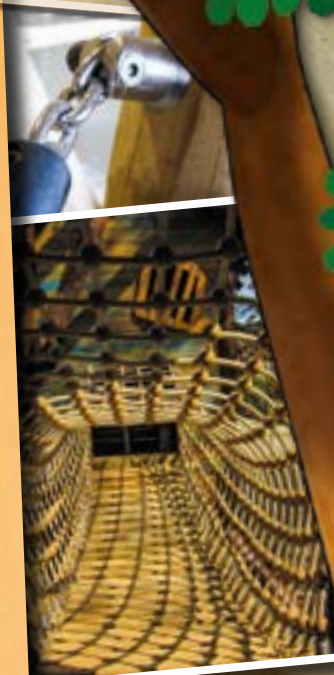

We build our play equipment from Robinia which is sourced from sustainable forestry.

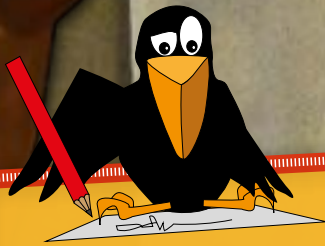

Spielart GmbH is FSC®-Chain of Custody certified.

C128728

Quality

- **Posts:**
Robinia trunks - naturally grown, sanded, sap wood free, unstained
If desired and structurally uncritical, post shoes can be used.
- **Coverings, roofs / walls, beams:**
Robinia or oak planks
- **Nets and ropes:**
Herkules material
- **Connections:**
Threaded rods A2 with self-locking nuts and caps; all fittings made of stainless steel
- **Colored design:**
Natural oil glazes and water-based natural wood colour
- **Statute of limitations of claims for defects:**
Twelve years for all wooden components
Five years for all third-party add-on items (e. g. slides, nets, chains)
Warranty claims are subject to a regular and proven, documented care and maintenance in accordance with the care and maintenance plan.

Page 56

Project planning

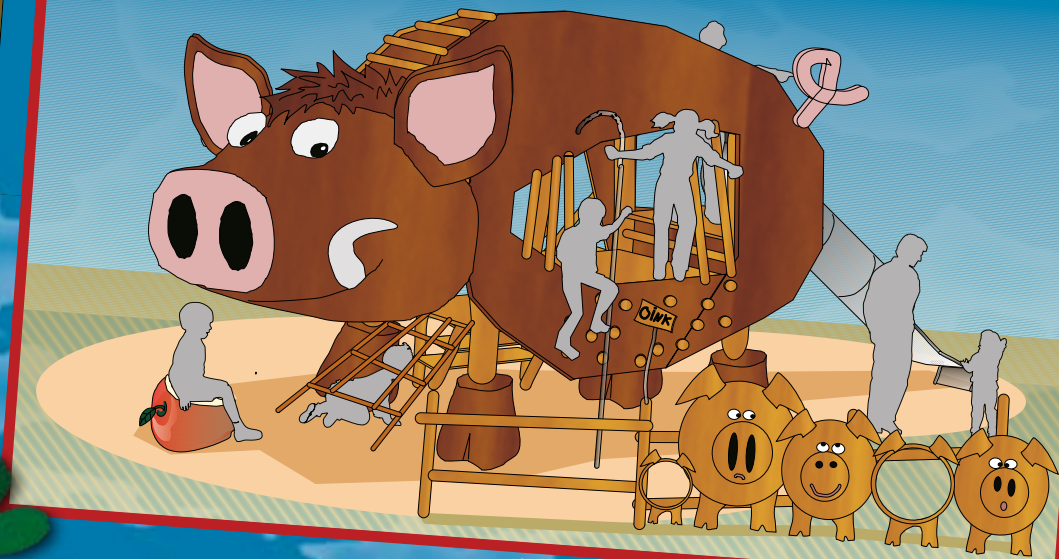

The planning of individual projects always begins with an analysis of the specific site and the client's requirements. We also take into account any of the client's particular requests and ideas. The end result: project plans that are prepared in cooperation. We use scale drawings, layout and foundation plans, and models, if necessary, to illustrate our ideas. The particular details of each project are personally discussed and then finalised.

If you would like to incorporate our play constructions in your planning, we would be pleased to provide you with our planning tools (CAD data). In addition to the requirements, our conceptions also include our own design ideas. As well as a price quote with detailed description, interested parties will also receive a drawn design proposal that describes our ideas with as much detail and information as possible.

Conforming to standards

All our play areas are in accordance with the **EN 1176** - the European standard for playground equipment. All our equipment, in particular special and custom made, will be checked after production at our factory or after assembly on-site by an independent safety inspector.

This brochure gives you an insight into our product variety. Let you be inspired by the imaginative worlds of our themed playgrounds. Here you will find a wide range of different theme worlds that will make children's hearts beat faster.
